Problem Statement	
The problem of	Don't have the tools or the information to assess the nutritional quality of what user cook.
Affects	Students and Faculties of Primeasia University
The impact of which is	Lack of proper nutrition and getting sick easily.
A successful solution would be	Nutrition tracking system track their daily nutrition tracking in terms of calories, protein, fat, and carbohydrates. So, that the user can get proper nutrition and live a healthy life.
Vision statement	
For	Students and Faculties of Primeasia University
Who	track nutrition and suggest Nutrition requirements.
The product	PAU Nutrition tracking system app.
That	Will provide a proper nutrition chart & helps to get perfect balanced food every day. So, that people can be more active. Our system collects data(age, weight, height) from users so that each person will know their required nutrition.
Unlike	Lot's of Nutrition & diet apps for Android & iphone but most of the app doesn't have our local food nutrition data.
